

Date: 24/01/22	Time: 1300-1320	Place: Zoom
----------------	-----------------	-------------

**Attendance**

**Attended:** Jed Muff (JeM), Eric Hannus (EH), Julius Mikala (JuM), Antti Sippola (AS), Jere Vepsä (JV), Rituraj Kaushik (RK)

**Apologies:** -

**Missing:** -

**Agenda**

1. Session aims
  - a. Meet each group member for the first time
  - b. Meet the instructor (RK) for the first time
  - c. The instructor (RK) will tell us a bit about the project
2. Any other business
  - a. Asking questions to the instructor about the project
    - i. Do we know official deadlines?
    - ii. Do we make everything from scratch?
      1. What resources do we have?

**Outcomes:**

- Each group member introduced themselves and so did the instructor (RK)
- First time for us all to be doing this course
- Established a few things about the scope of the project
  - We are improving upon the previous design
  - Expanding upon this, we should work out a way of accurately measuring the performance of last year's design (Cost, learning time, durability?)
- We will wait until after tomorrow's lecture to find out about deadlines.
- We have everything about the previous design in the GitHub:  
<https://github.com/OteRobotics/realant>

**Action Log**

Action to be taken	Who is responsible	Deadline
Show up to tomorrow's meeting after the lecture.	All	25/01/22
